Everyday - the Volume

fully abstracted, & abstract

with htd. -

What good experiments might be
made of mixing pollen together
of several kinds -

p. 12. Male & female gametes in hybrid
are equally affected

According to Gortner (p. 273.) when
several varieties ^{of the same species} are crossed with
another strain, offspring closely alike.
but when several close, but true
species are crossed with another
species offspring very unlike.

This must be tested in
the work, specially in case of
microtus. - In the case of the
experimented on plants of var. of
microtus var. galeppa. but I fear that

var. affected only in the colour.
But Sir Chapman remarks the microtus galeppa. & says it

var. of galeppa
